TABLE FEATURES

Table Finishes

Our furniture finishes form a tough coating to shield your furniture because scuffs and spills do sometimes happen! Important! For the first 6 months of your new table, give extra care to protect your table. Do not use furniture polish for the first six months.

Our finishes are resistant to water and most other common household liquids. All finishes are heat sensitive. Do not place hot dishes directly on the table. Always use coasters or placemats to protect your table. See page 133 for full finish care information.

Hand-planed Tops

Handplaning has the best appearance in cherry wood. Tearouts, gouges, spoke-shaved edges and rippled surfaces are a standard result of hand-planing to give an authentic antiques appearance.

Corner Brackets

Table legs are bolted to sturdy corner brackets for easy removal. The brackets are notched into the table skirting for secure leg support.

Table Levelers

Table glides are sized to match leg footprint. They adjust in or out to level your table or to match an uneven floor.

Extension Slides

All pedestal tables have geared slide rails to maintain balance and stability. Hardwood slides are standard on all our extension tables. This support frame-work expands smoothly and is dependable for years of use.

Self-storing leaves

Many of our extension and pedestal tables have convenient space inside the table for leaf storage. Just extend the table, lift leaves out

and place them in the table! Look for labels which specify the self-store feature. The table is not self-storing if it has no self-storing label.

Edge Options

Each table is designed with a standard edge, noted with each table’s specs. A nonstandard edge may be custom-ordered if table specs indicate availability.

#30 SIMPLE EDGE

7 - FRENCH SKIRT
#30 SIMPLE EDGE

All 190 tables with 30" tabletop height have a minimum skirt height of 24".

No edge options for 190 tables.

Easily extend your tabletop without removing items from your tabletop.

One person can easily and quickly pull out the leaf stored beneath the table top. The leaf rocks back and slides forward to interlock with tabletop.
